

OWA (Outlook Web App) Access to Exchange Online Mailbox

Microsoft Exchange Online enables remote access to a range of services – including e-mail, calendar, schedule, contacts, tasks and more – via the OWA (Outlook Web App) browser interface.

To connect to these Exchange services from afar via OWA, perform the following:

1. Use your browser to access the address <https://outlook.weizmann.ac.il>.
2. On the Weizmann Institute sign in page that loads, enter your e-mail address and password, then click **Sign in**.
